

iCUE DESKTOP DJ MIXING STATION

Mix, scratch and control MP3s on your computer just like a Pro DJ!

MP3 MIXING SOFTWARE & HARDWARE CONTROLLER

ION's iCUE helps you mix MP3 files directly from your computer using specially-designed hardware. iCUE features **CUE LE** professional DJ software from Numark, and a dedicated controller, allowing you to scratch, control pitch and automatically beat-match digital music like a pro. Built-in sampling and looping helps people with little or no DJ experience mix like a pro.

Preview the music through your headphones before it hits the crowd.

You can also record your performance to create mixes to listen to on your iPod or other personal audio player!

iCUE has everything you need to DJ with your computer.
