To play patches on the expansion board, please set all the EFFECTS ON/OFF settings on the JV-1010/1080/2080 and XP series to "ON."

* Several of these patches are designed to take advantage of controllers (such as modulation, aftertouch, or an expression pedal).

* Note that the Release Time has been set to a fairly long value for some of the patches. As a result, if your sound generator has been set so "Patch Remain" is "ON," the release portion of a previously sounding patch may continue to be heard even after switching to a new patch.

* Refer to the owner's manual for your instrument for specific instructions on how to select and play Patches on the expansion board.

* On the JV-1010/1080/2080 and XP series, you can not select only the Patches which are designed to be used with the JV-80/880/90/1000.
