

# MØLLER

## USER'S MANUAL

### **Congratulations on the purchase of your new T-Rex pedal**

*T-Rex grants a 2-year warranty against defective parts or workmanship.  
In the event of a defect, please contact the nearest T-Rex dealer.*

#### **MØLLER**

Møller is a classic overdrive pedal that provides a wide range overdrive tones, as well as a separate transparent 0 - 20 db adjustable clean boost and a unique overdrive/clean mix option.

The mix knob lets you dial in the perfect balance between distorted and non-distorted signal. Rolled all the way up and with distortion maxed too, the pedal sounds just like an old tube amp on full volume. Roll the mix knob back a bit, and your clean signal starts to get through, meaning that if you pick lightly, or roll back the volume on your guitar, you get a stunning clean/softly clipping sound that retains all the feel and dynamics of your original tone, only bigger, louder and richer.

The boost function let's you dial in a solo level, whether the overdrive circuit is activated or not.
