

▼ These pedals are employed whenever there is a need to command or control the instrument condition by foot. For

example the keyboard player may use it for the sequencer's start/stop; the guitar player to activate an amplifier reverber

section and so on. In fact we can distinguish two basic groups: on-off and sustain ●

STANDARD SERIES

▼ It is a series which strikes for its innovative and functional design made out completely of ABS thermo-plastic

material. The electronic components used are of the best quality ●

PFS28

On-off control pedal, tough ABS, with 1.95m cable

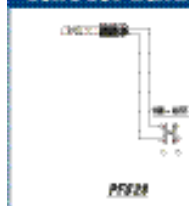

PFS28	TECH INFO
Control	ON-OFF switch
Output	1.95 mt. fixed lead with ø 6.3 mm mono jack plug
Rating	0.3A/30V DC
Dimensions	70 (w) x 98 (d) x 28 (h) mm
Weight	0.2 kg
Volume (1 pcs)	0.00106 cbm
Master Pack	30 pcs
