

# Acoustic Dimensions.

## AD-3 ACOUSTIC INSTRUMENT PROCESSOR *For Guitar*

### Bringing Great Tone to Acoustic-Electric Guitarists.

The needs of acoustic-electric guitars and basses are quite different than those of standard electrics. You need a preamp voiced specifically for an acoustic instrument, a way to reduce feedback, and a range of effects that naturally enhance your instrument without coloring the sound too much. The AD-3 and AD-5 Acoustic Instrument Processors give you superb tone-enhancing and feedback-reducing tools for both studio and stage.

#### AD-5 *For Guitar* Acoustic Instrument Processor

#### ■ AD-3 Specifications

● AD Conversion 20-bit  $\Delta\Sigma$  Modulation ● DA Conversion 20-bit  $\Delta\Sigma$  Modulation ● Sampling Frequency 44.1kHz ● Connectors Input (1/4"), Outputs (L, R: 1/4" TRS), DC In ● Power Supply DC 9V Dry Batteries, AC Adaptor ● Current Draw 90mA ● Dimensions 170(W) x 156(D) x 70(H)mm (6-3/4" x 6-3/16" x 2-13/16") ● Weight 1kg/2 lbs. 4 oz. (including batteries) ● Accessory Dry Batteries x 6 ● Option AC Adaptor (PSA Series)

# Stay In Tune, All the Time.

## TU-12 CHROMATIC TUNER *For Guitar For Bass*

### The Worldwide Standard in Compact Auto Tuners.

Used by professional musicians the world over, the BOSS TU-Series Tuners, and the TU-12 model in particular, have set the standard for everyone else to follow. These tuners automatically detect the note being played, display it, and show its tuning status. Rounded out with features like wide tuning ranges and built-in condenser mics, the TU-Series is the best way to stay in tune, all the time.
