Audio Editing and Production Software

## Step 1: Record Your Audio

## Step 2: Edit Your Mix

## Step 3: Export and Share

### Record. Edit. Produce!

Sound Forge<sup>®</sup> Audio Studio<sup>™</sup> software is the easy-to-use program that lets you record, create and edit your own music on your PC. Sound Forge Audio Studio software is everything you need to create and share your own music, mixes and multimedia clips. Record from a CD, microphone, LP, cassette, or musical instrument, and edit your recording using studio-quality tools and effects. You can cut, paste, and delete audio in real time so you hear the results immediately!

With Sound Forge Audio Studio software you can save audio in over 10 popular formats including MP3, WAV, WMA, and more. Or export your audio files to portable MP3 devices or Sony<sup>®</sup> Net MD<sup>™</sup> players. You can also create custom music CDs using track-at-once CD burning so you can take your favorite mixes with you. If you want to record music, edit and restore audio, create streaming media, and burn songs to CD, Sound Forge Audio Studio is all you need.

### Professional Effects and Processing

It's easy to get professional-sounding results, even if you're a beginner! Sound Forge Audio Studio software lets you perform precise, real-time editing using simple drag-and-drop operations. Apply professional audio effects to your songs such as EQ, delay, reverb, and chorus. And liven up your projects with sound effects from the included 1,001 Sound Effects CD.

You can also use Sound Forge Audio Studio software to synchronize audio with video — make your own music videos! Powerful editing tools make it easy to crossfade audio tracks, balance sound levels, and create smooth fades — even eliminate clicks and pops from vinyl or other recordings. Sound Forge Audio Studio software is the fastest way to turn your PC into a digital production studio.

### Publish to ACIDplanet.com

Want to get heard? Upload your music to ACIDplanet.com. A thriving online community of over 100,000 musicians and content developers, ACIDplanet.com is the place to share and promote your work, enter contests and collaborate with other ACIDplanet citizens on a wide range of audio and video projects. Remix songs from major-label artists, create videos, and more.

Audio Editing and Production Software

## Audio Recording

It's easy to record audio on your PC. Just plug a microphone or instrument into your computer's sound card and start recording. Capture instruments, vocals, keyboards or just about anything that can be connected to your computer's sound card input.

## Studio Quality Effects

Apply over 30 built-in effects and processes including EQ, delay, chorus and reverb to your audio. Eliminate clicks and pops using Audio Restoration tools. Liven up presentations, recordings and music with the included 1,001 Sound Effects.

## Powerful Audio Editing

Cut, paste and delete audio in real time and hear results immediately. Fix uneven sound levels, trim unwanted sections and synchronize audio with video. Even create your own music loops and samples to use with ACID Music Studio software.

### Record It

### Powerful Editing

### More Ways to Share

## CD Extraction and Burning

Extract songs from your own CDs for immediate editing and mixing. Sound Forge Audio Studio software makes it easy to burn your own CDs in minutes.

## Easy Audio Encoding

Quickly convert audio files into MP3, Windows Media<sup>®</sup>, QuickTime<sup>®</sup>, and RealMedia<sup>®</sup> formats for the Web, or export your songs to portable MP3 devices, Sony<sup>®</sup> Net MD<sup>™</sup> players and more.

## Online Sharing

Want to get heard? Upload your music to ACIDplanet.com. Join the community and get feedback from other musicians from around the world. Listen, download, create playlists, remix songs by popular artists and download free loops.
