NEW PEDAL

Famulus

Servant to the Sorcerer!

Gate Keeper of the True Tone!

Alchemy is a bridge between Earth and Heaven, matter and spirit, the solid and the fluid, the visible and the invisible, bringing the horizontal and the vertical together." ~ J. Ramsay.

The FAMULUS is here to aid you in your quest for Tonal Alchemy! Parallel distortion circuits operate with independent gain controls but with a shared tone and volume. The alchemy control allows you, the master, to use either circuit or any blend of the two. Tonal Nirvana, by Zeus!

Circuit A produces a biting, crunchy sound whilst Circuit B delivers a fat mid range punch. The real magic kicks in when you blend the two and adjust the gains independently - use lots of the biting circuit with low gain and add a smattering of the punchy circuit with high gain, way back in the distance. Or the reverse. Or any combination you like. Go on, you know you want fiddle, you crazy thing!!!

A multitude of tones, A myriad of flavours, A cornucopia of useable distortions! Add to all that buckets of boost in the volume control and you have more than just an exciting distortion box, you have something that just leapt from the Book of Shadows, sporting long hair, a Les Paul and an uncontrollable desire to scream "Let's Rock!" into the nearest microphone!!!

The Journey begins. Your servant is ready.
