

# ULTRAPATCH PRO PX2000

## Technical Specifications

Version 1.1 May 2000

ENGLISH

### ARCHITECTURE

The ULTRAPATCH PRO PX2000 allows to patch the audio signals of most components in your studio from a central point and send them to other units, which makes your entire cabling better structured and is indispensable for professional work. If you want to use your studio as effectively as possible then it is preferable to use a complete patchbay wiring scheme, but even less sophisticated patchbay solutions will benefit smaller studio configurations.

With the BEHRINGER ULTRAPATCH PRO PX2000 you will own an easy-to-use 24-patchbay offering phone jacks throughout, which can be operated in four different modes simply by setting a switch on the upper panel.

### FEATURES

- ▲ Professional patchbay to keep everything under control
- ▲ 24-point patchbay completely equipped with phone jacks
- ▲ Four different modes at the flick of a switch: parallel, half-normalized, normalized, open
- ▲ High-grade components include metal housing, metal-ring jacks and fiberglass boards

### SPECIFICATIONS

#### Dimensions

Width 19" (482.6 mm)  
Height 1.75" (44.5 mm)  
Depth 3.66" (93 mm)

#### Weight

app. 1.8 kg

#### Connectors

1/4" jack unbalanced
