

# SP-505 Groove Sampling Workstation

## A Complete and Affordable Workstation for Sampling Musicians.

The BOSS SP-505 Groove Sampling Workstation is the ultimate tool for working with sample, loops and laying down beats. This compact box gives you eight voices of CD-quality sampling, sophisticated sample editing tools including Chop, Pitch and BPM Sync, plus a 4-part sequencer for creating grooves using samples or onboard Tones. And with 26 killer DSP effects—plus an easy graphic interface with realtime control knobs—the SP-505 has everything groove musicians need to build cutting-edge tracks.
