Stealth plug

POWERED BY AmpliTube

Includes **6** **software & sounds** packages!

The most complete hardware/software bundle solution for Guitar and Bass players at an unbeatable price!

① AmpliTube 2 Live standalone with SpeedTrainer + ② AmpliTube 2 Live plug-in guitar and bass amps and effects

AmpliTube 2 Live comes both as a standalone application and a plug-in compatible with your favorite recording software, including Pro Tools, Cubase, Logic, GarageBand, and others. Fully MIDI-controllable, AmpliTube 2 Live is based on AmpliTube 2's unique DSM™ technology and includes 3 guitar and bass amplifier models of the most sought after vintage gear, 11 effects, a built-in tuner, an amazing selection of more than 128 customizable user presets, and SpeedTrainer, an integrated audio player with pitch and speed control, ideal for learning your favorite songs.

③ Mackie Tracktion 2.1 Audio/MIDI Sequencer

StealthPlug includes the full version of Mackie Tracktion 2.1, a revolutionary, easy-to-use Audio/MIDI sequencer and music production application that contains everything needed to professionally record and mix on a Mac or PC. Tracktion's hallmark is a clean, single-screen interface and streamlined operation, whether you're recording tracks, MIDI programming, or mixing down songs. It offers rock-solid operation and a very low CPU usage with operating systems ranging from Mac OS X to Windows 2000 and XP. And it contains a whole host of professional features that you can actually use from day one.

④ SampleTank 2 SE with 64 Sounds

StealthPlug includes also SampleTank 2 SE, a polyphonic, multi-timbral, sample-workstation with multi-effects unit and integrated sounds banks combined into a unique instrument. Browse through its 64 high-quality, acoustic and electronic sounds such as piano, drums, bass, guitars, strings, synths and more. Select them with one click and have them ready to play instantly with your MIDI tracks or through your keyboard controller.

⑤ T-RackS EQ 6-Band Mastering EQ

T-RackS EQ is one of the modules included in the full version of T-RackS mastering suite plug-in, the most popular mastering software on the market. T-RackS EQ features the same great sound and functionality of the EQ included in the full version of T-RackS and it is a great EQ both for mixing and mastering.

⑥ 500 MB of Guitar, Bass, and Drum Grooves from Sonic Reality

With StealthPlug, we've included 500MB (over 150 different loops!) of the best drum, bass, and guitar loops and grooves from Sonic Reality, for you to jam along with. With StealthPlug, we have thrown in the band for free!

Stealth plug

POWERED BY AmpliTube

Guitar/Bass USB Audio Interface Cable

includes **AmpliTube 2 Live** and more!

StealthPlug™ is the first compact 1/4" jack to USB audio interface cable for Guitar and Bass players to plug into the world of software-based amp/effects modeling and recording.

A simple, easy to use, 1/4" jack to USB audio interface cable for your Guitar or Bass

StealthPlug is the first audio interface for guitar and bass integrated into a simple, miniaturized, 1/4" jack to USB cable with full input/output processing for your PC or Mac. It's so easy to use that you will be able to plug into your computer as you would plug into an amplifier. Be ready to rock in seconds and plug into the world of software-based amp/effects modeling and recording.

Includes AmpliTube 2 Live standalone and plug-in - The most popular software for Guitar and Bass players

StealthPlug includes the new, easy to use, award winning, AmpliTube 2 Live standalone and plug-in for your favorite recording software. Fully MIDI-controllable with 3 guitar and bass amplifier models of the most sought after gear, 11 effects, mic-modeling with 2 microphones and position controls, built-in tuner and more than 128 customizable user presets. Plus the standalone version also offers the new SpeedTrainer, an integrated audio player with pitch and speed control, for playing with or learning your favorite songs.

The most complete hardware/software bundle solution at an unbeatable price

4 additional software packages bundled with the StealthPlug make it the most affordable and complete hardware/software solution for playing, practicing and recording on the market. Compose and record with the full audio/MIDI sequencer Tracktion 2.1 by Mackie, fine tune your work with IK's acclaimed T-RackS 6-band mastering EQ, use the included SampleTank 2 SE sound workstation and its 64 sounds to compose and arrange your MIDI tracks, plus get access to a staggering 500MB of Sonic Reality loops with guitar, bass and drum loops for you to use within your songs or play along with. Moreover, you will also be eligible for upgrades/crossgrades to the the full versions of the included software and the entire IK range at highly reduced prices, making the StealthPlug the best value for any guitarist or bassist!

Portable, anywhere you want to go

StealthPlug is the perfect companion for mobile guitarists and bass players, taking up just a little more than the space of a cable to bring it with you. Use StealthPlug with your laptop or home computer as the best solution for practicing, playing live, or recording. Capture your best ideas right when they come to you, whenever or wherever you are.
