DUAL-TRACK
LOOPER PEDAL

Introducing the Sheeran Looper +

INTRODUCING THE

SHEERAN LOOPER +

Sheeran Looper + is the next-generation powerful and portable dual-track looper pedal. Looper + features Ed Sheeran's looper workflow, stadium-grade die-cast aluminum pedals, and an intuitive 1.8" color screen with RGB LED loop status ring for heads up performance information.

Designed by Ed and his production team, Looper + utilizes custom DSP powered by HeadRush® that offers class-leading audio quality and stacks of connectivity options for performing on the street, in the studio, or up on stage! Looper + is the perfect compact looper whether you're just starting out, or a professional musician looking to upgrade your existing pedalboard with an intuitive new looper pedal.

DUAL-TRACK
LOOPER PEDAL

Introducing the Sheeran Looper +

Two Pedals, Infinite Possibilities

Looper + features the exact same premium die-cast pedals found on Ed's stadium stage looper. These pedals have been precision-engineered with optimal dimensions and spring pressure to be consistently easy-to-operate, helping you focus purely on your looping performance.

These ultra-durable pedals control the track record, overdub, playback and stop status of your loops, and feature hold functionality to undo/redo and clear your loops with ease. You can also connect an optional external single or dual footswitch and/or MIDI controller to Looper + for assignable feature control such as soloing and muting tracks, reverse and 1/2 speed playback, as well as fading loops in and out.

Easily Save and Load Your Loops

Capture, save and share inspiration when it happens. Sheeran Looper + lets you store up to 128 loops with over 3 hours of total onboard storage time. When connected to a Mac or PC, the Looper + appears as a plug-and-play USB storage device, making it easy to transfer loops via drag-and-drop without having to install any extra software. Sharing your loops with the world has never been easier.

Over 6 Hours of Battery-Powered Looping On-The-Go

Take your looping skills on the road! Looper + can be powered for over 6 hours from a single set of four AA batteries - perfect for gigging and street performance. Alternatively, you can connect Looper + to a standard 9V 500mA (center-negative) pedalboard power supply and integrate it into your pedalboard. You can even power Looper + directly from the USB port for easy loop transfer with a Mac or PC.

Well Connected

Looper + features a mono combo XLR and 1/4-inch input for connecting a standard dynamic microphone for vocals, a stereo pair of 1/4" inputs for connecting an instrument like guitar or keyboard, a stereo pair of 1/4" assignable outputs, a 1/8" MIDI input (with included 5-pin adaptor) for external MIDI sync and feature control, 1/4" external single or dual footswitch input, and a USB port for recording, transferring loops and MIDI sync to a Mac/PC.

Record and Stream Via USB

Looper+ makes it easy to reach a wider audience with your creations and performances. When connected to a Mac, or PC, Looper+ simply functions as a 2-in / 2-out USB audio interface, making it easy to record using your favorite DAW, or to set up live streams and play to the world.

Different Looper Modes for Versatility

Looper+ offers intuitive looping out-the-box with four different looper modes to achieve your ideal looping workflow.

Single Mode: 1 track with limitless layers for creating simple and powerful loops like Ed did when building his live show career

Multi Mode: 2 tracks with a global loop length for building tracks, just like Ed's stadium stage looper workflow

Sync Mode: 2 tracks with different lengths that automatically stay in sync with each other

Song Mode: 2 tracks with same or different lengths that function as independent song sections (ex. verse, chorus, etc.)

FEATURES

FEATURES

Designed by Ed Sheeran and his production team

- Intuitive Sheeran Looper™ single- and dual-track workflow
- Featuring 4 looper modes: Single, Multi, Sync and Song

Professional Hardware

- Incredibly durable die-cast aluminum pedals, as used on Ed's stadium stage looper
- Full-color 1.8" display, loop status LED ring, and LED input / output monitoring
- Custom DSP powered by HeadRush®
- Professional 32-bit audio
- Undo/redo, solo, fade, reverse, 1/2 speed, solo, and mute performance functions

Connect Instruments and Microphones

- Combo XLR + 1/4" (6.35mm) input for connecting a dynamic microphone
- Stereo 1/4" (6.35mm) inputs for connecting guitars, basses, keyboards, or other instruments
- Stereo 1/4" (6.35mm) outputs can be run in stereo, mono, or split modes

FEATURES

FEATURES

Connect External Gear

- 1/4" (6.35mm) external footswitch input for connecting additional footswitches
- 1/8" (3.5mm) MIDI input for external sync and external MIDI feature control

Battery and Mains Powered

- Power via standard 9V power supply, USB, or (4) AA batteries for street or stage performance
- Over 6 hours of battery life during normal use; (4) AA batteries included

Recording and Storage

- Save up to 128 loops with over 3 hours of audio to internal storage; import/export loops via USB
- Record your performance to Mac/PC via the integrated USB audio interface

Technical Specifications

Technical Specifications

Display	1.8" color LCD display
Housing	Matte black powder coated steel chassis
Pedals	(2) die-cast aluminum pedals with titanium grey satin finish
Controls	360° navigation wheel with push-to-enter and hold function with RGB LED ring indicator Instrument input gain control knob with real-time LED input level meter Microphone input gain control knob with real-time LED input level meter Main volume control knob with real-time LED output level meter

Rear Panel I/O

I/O	Combo XLR+1/4" (6.35 mm) balanced input (mono) (2) 1/4" (6.35 mm) balanced inputs (stereo pair) 1/4" (6.35 mm) single or dual footswitch input (TS or TRS) (2) 1/4" (6.35 mm) balanced outputs (stereo pair) 1/8" (3.5 mm) MIDI Input (5-Pin to 1/8" adapter included) USB Type-B port Power adapter input with power switch and cable restraint

Looping Specifications

Looping Modes	4 (Single, Multi, Song, Sync)
Looping Functions	Record, Overdub, Play, Stop, Undo/Redo, Clear Track, Clear All, Reverse, 1/2 Speed, Fade In/Out, Solo, Mute
Max # of Looper Tracks	2
Max Loop Length	1.5 Hours
Max Overdub Layers Per Loop	Unlimited Layers
Max Overdub Time Per Loop	30 Minutes
Loop File Storage Format	.WAV (32-Bit PCM, 44.1 kHz)
Max # of Stored Loops	128
Onboard Storage Time	Over 3 Hours
Onboard Storage Space	~4.1GB

Audio Processing Specifications

Processor Type	Custom single-core HeadRush® DSP
System Audio Bit Rate	32-Bit PCM
System Audio Sample Depth	44.1 kHz
A/D D/A Conversion	24-Bit

Other Features and Functionality

External Pedal Assignment	Yes (for Single or Dual Footswitch)
USB Transfer Mode	Yes
USB Audio Interface Mode	Yes
Control from External MIDI Devices	Yes
MIDI Clock Sync	Receive
Audio Routing Customization	Stereo, Mono or Split (Loop/Dry)
