

DB2050

Stereo Multi-Media Active DI Box

ON-STAGE AUDIO

FEATURES AND BENEFITS

The DB2050 Active Multi-Media DI Box transforms any line level stereo source into a low-impedance (XLR) signal ready to be sent long distances to a mixing board or recording console. Its active design features isolated inputs, a 15dB pad switch, ground lift switch, and polarity switch. Stereo 1/4", 3.5mm, and RCA inputs make it perfect for computers, mp3 players, keyboards, projectors, and DJ equipment.
