# DARK DESIRE

Warp X™, the new master of NuMetal. The distortion-free Clean channel gives loud, clear voice to effect-laden sounds. The savagely brutal Warp channel, created for detuned guitars and those of the 7-string persuasion, supplies the heavy artillery in the low end. The 120-watt power amp section with 6L6 tubes gives both channels the kind of power and punch that will leave 'em shaking in their boots. If you've got a musical statement to make, have no fear – you'll be heard.

PAUL CROOK  
MEAT LOAF

Besides having so much power that you'll never run out of headroom, Warp X™ offers a unique set of smart, useful features unmatched by any other amp. You want ultimate responsiveness? You want an amp where your guitar strings start to feel like a natural extension of your fingers? Press the LUBE switch in the Warp channel, and your guitar doesn't just say "I can", but "I will." If you use a MIDI pedal and want to switch internal amp channels and external effects simultaneously, then you're in the right place. With the optional MSM-1 MIDI module, it's no problem. But probably the coolest live-performance feature is the fact that the FX loop can be switched to either serial OR parallel use, so that your external effect units can be assigned to either the entire amp or to just one of the two channels. In practice this means that in one moment you have a Clean sound with chorus, echo, etc., and in the next, with just a press of the footswitch, you've got nothing but pure, heavy Warp sound. And not only the features are hot: the glowing red plexiglass front panel reveals a view into the inner sanctum of glowing hot vacuum tubes, and makes clear what this amp is made of – Pure Dark Energy.

# RAW POWER

# DARK DESIRE ± RAW P⊕WER

- 120-watt power amp section with 4 x 6L6 tubes
- Preamp section: 4 x 12AX7/ECC83
- 2 channels: Clean, Warp

## CONTROLLER
