## Two-Channel Tube Mic-Preamplifier

BlueTUBE

Finally, a superior quality, stereo tube microphone/instrument preamplifier that speaks to everyone's budget. The Presonus BlueTUBE provides impressive results for vocals, keyboards, acoustic and electric guitars as well as bass guitars. The BlueTUBE's output flexibility of XLR and TS jacks lets you send signals to both your amp and console simultaneously. The BlueTUBE allows you to create a multitude of audio textures and character by using the variable tube-drive circuit. The BlueTUBE is a true hybrid that blends the best of dual-servo solid-state technology with a 12AX7 tube-stage.

- Stereo Tube Mic Preamp Using a 12AX7 Tube and Dual-Servo Gain Stages
- Two XLR Inputs and Two High-Z Instrument Inputs on Front Panel via Dual Neutrik™ Combo Connectors
- 48V Phantom Power for Condenser Microphones
- -20dB Pad and Polarity Reverse on Each Channel
- Both XLR Balanced and 1/4" Unbalanced Outputs
- Two Eight-Segment LED Meters for Visual Monitoring
- External Power Supply
- Can Be Rackmounted via BMRA (Optional)

## Technical Specifications

BlueTUBE

Input	
Connector Type .....	Neutrik™ Combo
XLR Impedance .....	.5K Ohms
Hi-Z, 1/4" .....	1 Meg Ohms
Output	
Connector Type .....	XLR and 1/4" TS
Panel Controls	
Tube Drive .....	.0dB to +20dB
Gain .....	.0dB to 40dB
Phase Reversal	
-20dB Pad	
Phantom Power	
Performance	
THD + Noise (Unweighted) .....	0.05%
Signal To Noise .....	> 90dB
Power Supply Rejection .....	> 98dB
Amplifier Type .....	Dual-Servo
Meters	
LED .....	-28dBu to +18dBu
Physical	
Weight .....	7lbs.
Dimensions .....	8" x 4.5" x 1.75"
Mounting .....	BMRA Rackmount Adaptor
Power Supply	
Type .....	Linear
Input .....	18V AC
Power .....	20 Watts
Transformer .....	External
