xeGeo

Owner's Manual

Specifications

Power & Battery

Input: 110-240V AC 50/60Hz

Output: 5V DC \equiv 1A max. (total)

Battery: 800mAh Lithium Ion

CAUTION: Changes or modifications not expressly approved by Revolve Electronics, Inc. for compliance with FCC rules and regulations could void authority to operate this equipment.

How to use the xeGeo

Battery Installation

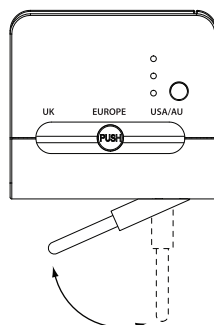

- 1 Remove the battery and battery door from the protective envelope.
- 2 Align the contacts on the battery with the contacts inside the battery compartment. Insert the battery's contact end first and then press the battery into place. Small tabs in the xeGeo will prevent the battery from going in the wrong way.
- 3 Slide the battery door into place.

Connecting to Power

The xeGeo can plug into every common AC outlet in over 100 countries. You can charge two USB powered devices *and* the xeGeo's internal battery at the same time! To select the appropriate plug style for the country you are in, do one of the following:

Europe

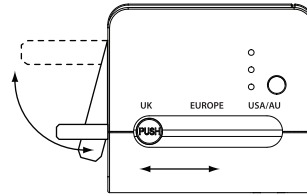

Fully depress the button to release the European style plug. Rotate and lock the plug into position to use. To put it away, rotate back into the xeGeo until it latches.

©2011 Revolve Electronics, Inc. All Rights Reserved

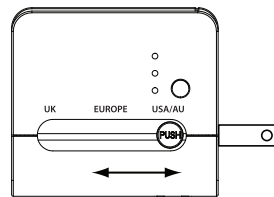

UK

Slightly depress the button while simultaneously sliding it to the UK position. Rotate the third post into position. To put away, repeat the steps in opposite order.

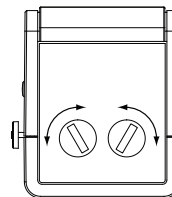

USA

Slightly depress the button while simultaneously sliding it to the USA/AU position. Slide back to center to put away.

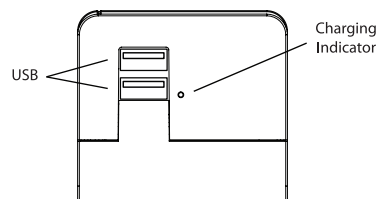

Australia

Follow directions for USA. Afterward, rotate each of the AC prongs until they stop at the correct angle.

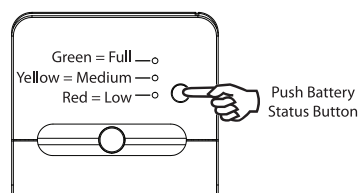

USB Charging

When plugged into the wall, the red charging indicator will illuminate and stay lit until the xeGeo and your mobile device is fully charged.

Backup Battery Status

To determine the amount of energy stored in the xeGeo's internal back-up battery, push the Battery Status Button. The lights indicate the level of charge.

Battery Replacement

The xeGeo includes an advanced lithium-ion battery designed for years of service. The xeGeo battery can be replaced using ONLY a Revolve Electronics xeBattery. The use of any other battery in the xeGeo voids the limited warranty.

To obtain a replacement battery and participate in our hassle free battery recycling program, contact Revolve Electronics Support online at www.revolveusa.com or by calling us toll-free at (800) 693-0068.

Troubleshooting

Step 1: Verify Compatibility – Before connecting any device to the xeGeo, check the power requirements for the device. The device must match the input or output requirements of the xeGeo. For example, the xeGeo's output is 5V DC and the external device(s) current demand must not exceed 1A (1000mA). If the voltage does not match (i.e. 6V, 9V, etc.), or the current draw exceeds 1A (i.e. 1400mA, 1.8A, etc.), do not connect it to the xeGeo.

Step 2: Check the Cable – Unplug, then reconnect the cable. Revolve cables are high-quality and designed to meet the xeGeo's requirements. Some cables do not connect all lead points and cables can easily get damaged or short out. If problem persists, replace cable with a new cable and retest.

Step 3: Check Battery Status Indicator – If your compatible device is not charging from the xeGeo and you have replaced the cable, check the xeGeo's battery status by pressing the battery status indicator button next to the USB outputs on your xeGeo. If the green light does not illuminate, connect the xeGeo to a power source and allow the xeGeo to recharge.

Note: Your xeGeo has built in battery protection circuitry that will automatically turn off your battery when the charge level is too low. To recover, simply connect your xeGeo to a power source without a device attached to the USB port and allow 4-6 hours for it to fully recharge.

Eliminating Waste

The xeGeo is made from a combination of recycled plastic blended with bamboo fiber. The packaging has been made from 100% post consumer recycled material. We encourage you to keep these materials out of the landfill by separating and recycling them, so that they may be used again.

Unlike proprietary AC chargers that become obsolete and battery backups that wear out, the xeGeo has been designed to be compatible with a wide range of devices and deliver many years of use. The xeGeo uses USB standard power specifications that have been widely adopted by the electronics industry.

Organizations like the International Telecommunications Union are implementing initiatives designed to expand the adoption of these power standards to make them truly universal. As a result, your xeGeo will provide power to a wide range of products both now and in the future.

After hundreds of charge cycles, a dead battery won't turn your xeGeo into waste – the xeGeo's battery is easily replaced. The xeGeo's battery uses advanced lithium ion technology to provide maximum service life. However, no battery will last forever. When you are ready for a new battery, contact Revolve Electronics Support either online at www.revolveusa.com or by calling (800) 693-0068 to purchase a replacement and participate in our hassle-free battery recycling program.

Service

To obtain service for your xeGeo, contact the Revolve Electronics Support department online at www.revolveusa.com or by calling (800) 693-0068.

Making a Difference

By purchasing the xeGeo, you have made a powerful choice. You have chosen to support a company that believes in a healthy planet, a sustainable lifestyle, a rich life experience, and the idea that these goals are not mutually exclusive. Revolve Electronics has made very conscious choices in the design and manufacturing of this product to include "green" features and use sustainable materials and processes. Your purchase has helped to validate the efforts of our team and makes it possible for us to continue to offer products that make a positive impact.

The team that has made this product possible is composed of hundreds of people around the globe. From the xeGeo's designers to the engineers, from the sourcing agents to assembly workers, our entire team appreciates you for enabling us to pursue our passions, dreams, and aspirations. In a very real and tangible way, we are now connected. To learn more about the story behind the people you have just made a connection with, visit us at www.revolveusa.com.

A Helping Hand

Every year, Revolve Electronics contributes 10% of our profits towards assisting green entrepreneurs. The best part is that you get to help us decide who receives this assistance. Simply visit us online at www.revolveusa.com, register your product, and you can cast your vote.

LIMITED WARRANTY

Revolve Electronics, Inc. ("the Company") warrants to the original purchaser that this equipment will be free from defects in materials and workmanship for a period of 1 (one) year from the original date of purchase. If a defect exists that is covered by this Limited Warranty, the Company will, at its sole option, (i) repair the product at no charge, using new or refurbished replacement parts, (ii) exchange the product with a product that is new or which has been manufactured from new or serviceable used parts and is at least functionally equivalent to the original product, or (iii) refund the purchase price of the product. A replacement product/part assumes the remaining warranty of the original product or ninety (90) days from the date of replacement or repair, whichever provides longer coverage for you. When a product or part is exchanged, any replacement item becomes your property and the replaced item becomes the Company's property. When a refund is given, your product becomes the Company's property. All warranty returns must be sent with postage and insurance prepaid.

LIMITATIONS

This Limited Warranty applies only to hardware products manufactured by or for the Company. This Limited Warranty does not apply to any non-Company hardware products or any equipment, even if packaged or sold with Company hardware. This warranty does not apply: (a) to damage caused by accident, abuse, misuse, misapplication, or non-Company products; (b) to damage caused by service (including upgrades and expansions) performed by anyone other than the Company; (c) to a product or a part that has been modified without the written permission of the Company; or (d) if any Company serial number has been removed or defaced.

Responsibility is limited to the actual cost of the item. Revolve Electronics, Inc. will not be responsible for expenses or inconveniences, or consequential damages occasioned by equipment, or by breach of any expressed or implied warranty with respect thereto. Implied warranties on this item shall be in effect only for duration of the expressed warranty set forth above and after the expiration of such expresses warranty there shall be no warranties, expressed or implied (including merchantability) on the product.
