# Edit<sup>TM</sup> CENTER Application Designed

*The Edit Center Series of multimedia studio furniture  
has been designed for a single purpose:  
to provide an elegant, ergonomic workspace  
for the video and digital content professional.*

Available in your choice of marbled graphite or rich cherry wood top, each desk system has been specifically designed to fit the way you work. Side-bay racks are contoured to match the desk contour, allowing you to easily adjust the angle and placement of computers and rackmount processing equipment. Additionally, every Edit Center side-bay rack features a reversible adjustable-height top. This unique feature provides for left or right placement and allows you to easily configure your system with racks that slide under the desktop or join the desktop flush depending on your preference.

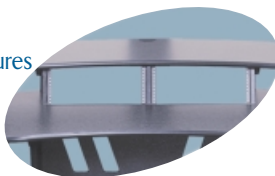

We believe that the features professionals require should be built-in — *not expensive options*. Edit Center racks specified with door kits include noise control and cooling systems mandated by today's increasingly powerful computers and noisy hard drive arrays. Gasketed doors (plexi front and solid rear) along with internal acoustical absorptive material reduce noise escaping from the enclosure by up to 22db. The rear door features a factory installed ultra low-noise cooling fan, plus a removable filter kit for air intake, while a brush grommet at the door bottom allows cable exit while maintaining a seal for noise and air flow. All Edit Center racks are assembled at the factory to save you time.

Desk systems are available in two sizes: 84" and 60" wide and include substantial overbridges capable of accommodating multiple 21" computer monitors as well as large program monitors. Two pivoting speaker platforms allow you to place your audio monitors at the optimum listening angle and are standard equipment on all Edit Center overbridges.

You have a choice of two overbridge styles to optimize your system: one features two 4-space rack bays angled for direct viewing, while the other features an open span underneath. Either style is available for any Edit Center desk.

## Edit Center SYSTEM COMPONENTS

**STUDIO FURNITURE** that is equally suited for all editing environments including post production editing suites, corporate video production rooms, campus learning labs, and broadcast production facilities.

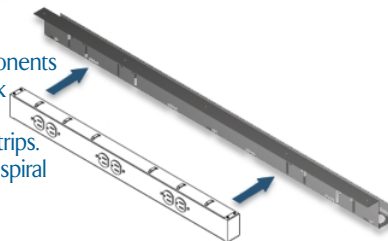

ELUR + D1 2DG

Matching contours on desktops and side bay racks allow for optimum positioning of computers and rackmount processing equipment.

Cable management and AC power are required components of any functional desk system. Every Edit Center desk comes complete with a rear cable channel that additionally accommodates standard Middle Atlantic power strips. Optional cable management kits including cable tie bars and spiral wrap are also available if required (CMS and CML).

## Noise CONTROL & COOLING

isolate intrusive equipment noise while maintaining proper equipment temperatures with our innovative line of isolation racks.

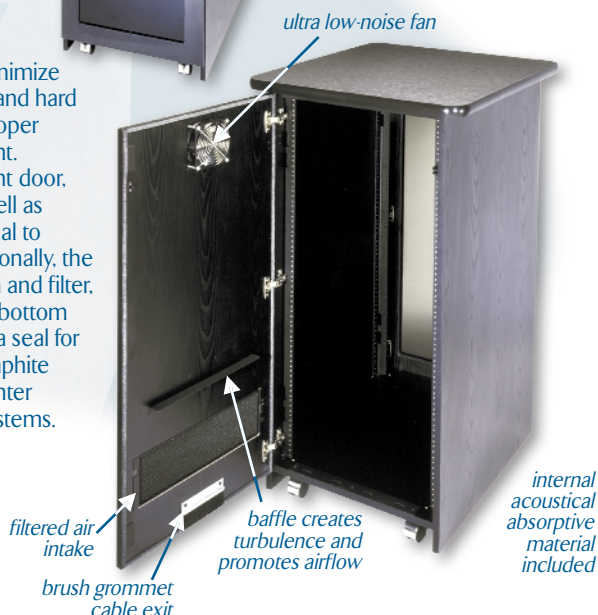

**S12SDG**  
**12 Space Isolation Rack**

Isolation Racks are designed to minimize noise caused by loud computers and hard drive arrays, while maintaining proper operating temperature for equipment. These racks include a plexiglass front door, and a gasketed solid rear door, as well as internal acoustical absorptive material to reduce noise by up to 22 db. Additionally, the rear door features a built-in quiet fan and filter, while a brush grommet at the door bottom allows cable exit while maintaining a seal for noise and airflow. Available with graphite finish top to match graphite Edit Center desks as well as Multidesk Video systems.

**S24DG**  
**24 Space Isolation Rack**

each stand comes complete with integral dual cable channel with flexible cover

**EC-SPK36**  
**Speaker Stands**

Speaker stands are optimized to accommodate near and mid-field audio monitors in video and audio production and editing facilities. 36" high, these stands feature highly aesthetic reversible cherry/ graphite laminate tops and bottoms to match our Edit Center and MultiDesk Video furniture. Also included with every stand is a self-adhesive foam pad to isolate speakers from the top platforms.

bases include carpet spikes & rubber feet

## Edit Center ACCESSORIES

**WRK-24MDK**  
**Welded Steel Enclosure**

The 24 space WRK-24MDK features a generous 32" depth and front and rear rackrail in a welded steel enclosure. Includes graphite top, plexiglass front door and casters.

# MDV MULTIDESK VIDEO™

The unique MultiDesk Video system is designed to provide a creative desk solution for a variety of applications including

desktop video production, web design, graphics, and multimedia content creation.

Utilizing a modular design, the MultiDesk Video System allows you to configure your furniture to accommodate the way you work. Whether you're a corporate video editor or a free-lance graphic artist, you can combine the six models in the series in any combination to create a system that meets your specific requirements. Featuring an attractive graphite top and sturdy steel-tube legs, the new MultiDesk Video system makes application-designed multimedia furniture available to those who previously had to choose an office desk or other furniture ill-suited for the job.

System above includes one each of:  
MDV-CNR 1 MDV-OB4  
MDV-DSK MDV-W  
MDV-R 12

## MDV-CNR 1

Corner desk includes configurable overbridge with one 4-space center rack bay, or two 4-space side rack bays, or center supports can be repositioned to provide a 32" wide open center span.

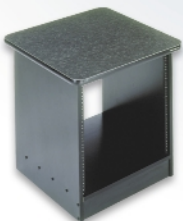

## MDV-CNR 3

Corner desk includes configurable overbridge providing overall height of 38 5/8" or 43 3/8" (perfect for accommodating digital audio mixers).

## MDV-DSK

Straight desk includes configurable overbridge with two 4-space rack bays, or center support can be removed to provide a 39" wide open span.

## MDV-R 12

Side rack provides 12 rackspaces, optional casters are available (MDV-CK).

## MDV-OB4

Overbridge provides an additional 4 rackspaces and mounts on any MDV-R 12 side rack.

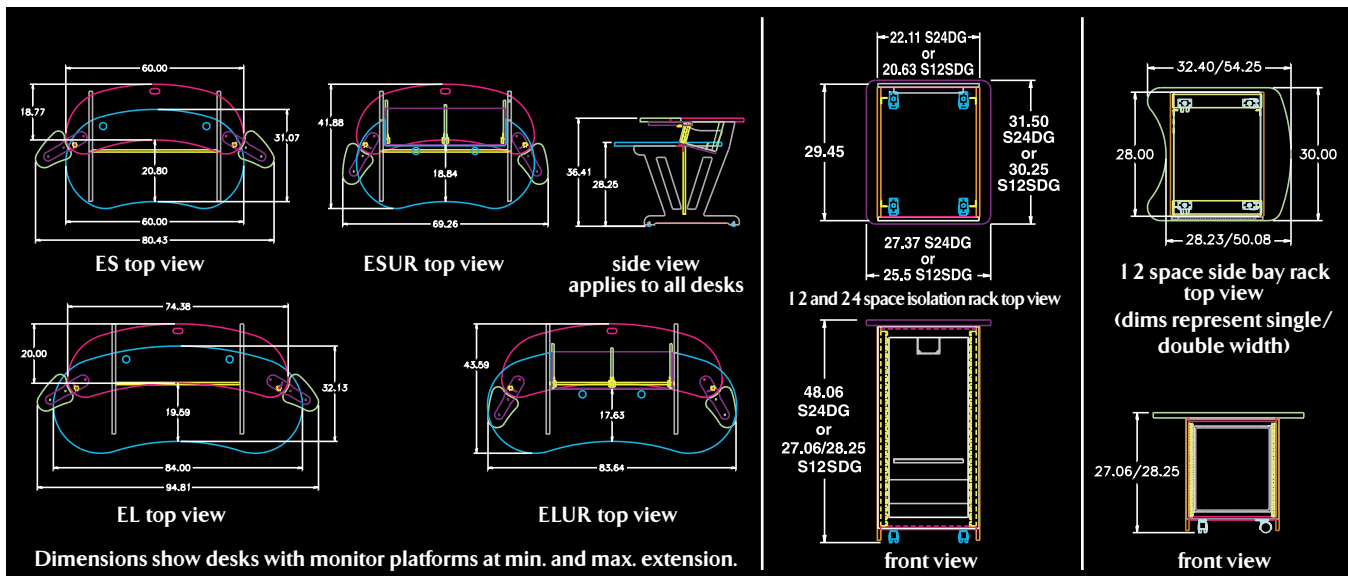

## MDV-W

Connecting wedge connects desk and rack components at an ergonomic 35° angle.

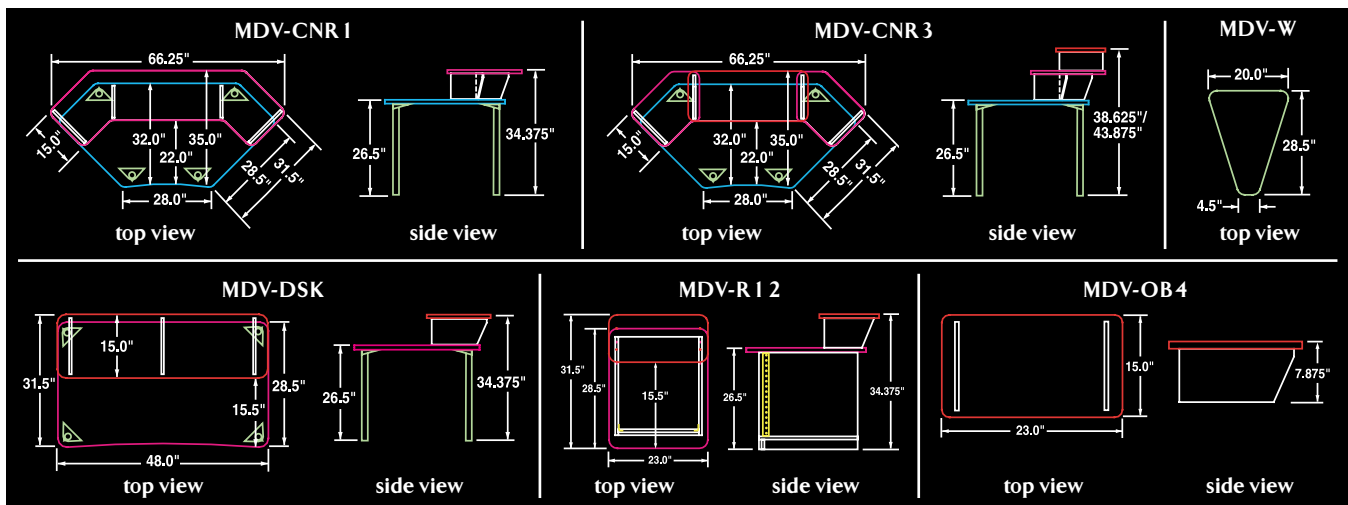

Lower 26.5" desk height provides correct ergonomics for desktop keyboard and mouse usage, eliminating the need for underdesk keyboard trays.
