**Notes:** \*Video playback not supported

\*\*MP3 files and AAC unprotected files can be played. Librarian should build the content for best interaction. Playback pitch can be adjusted, key-lock, loop, sample, and scratch functions can all be used in this mode.

\*\*\*MP3 files can be played. Songs must be present in IPOD playlist. Playback pitch can be adjusted, key-lock, loop, sample, and scratch functions can all be used in this mode.

**Using the iCDX with 5G iPod Video and 3G iPod nano:** Due to hardware and software changes made by Apple in the fall of 2006, only 5th generation iPod Video and 3rd generation iPod nano units produced prior to those changes are compatible with iCDX.

iCDX firmware v.45 allows units produced after June 2007 to read files on iPod classic, 3rd Gen. nano, and 2nd Gen. iPod shuffle. Update does not extend iPod compatibility on iCDX units produced prior to June 2007.
