

OWNERS MANUAL(M-10)

- Thank you very much for purchasing a M-10 Guitar Amplifier.

All of these controls are designed to give the widest variety of tones to practice with, including an amplifier stack.

Please read this instruction manual carefully before turning your M-10 on.

FRONT - PANEL

A. INPUT

Guitar Input jack .

B. GAIN

Input level control for distortion. When you turn the knob right, increase sharp distortion.

C. BOOST SWITCH

When button is pushed, additional distortion & gain circuitry is engaged.

D. VOLUME

Adjust the overall level or volume of the amplifiers.

E. TREBLE

Controls the high / treble frequency.

F. MIDDLE

Controls the middle frequency.

G. BASS

Controls the low / bass frequency.

H. HEADPHONE

The connection of headphone mutes the internal speaker for private practice.

I. LED

Indicates when the unit is on.

J. POWER

Turn the Amplifier on or off.
