

## MultiMix 8 Line

**EIGHT-CHANNEL, RACK-MOUNTED STEREO LINE MIXER**

**FLEXIBLE, EXPANDABLE MIXER FOR FIXED INSTALLATION, STAGE, AND STUDIO.** MultiMix 8 Line is an ideal mixer for the stage, studio, boardrooms, conference rooms, health clubs, restaurants, houses of worship, and more. MultiMix 8 Line is also a great fit for any band's live rig, especially for keyboard players and multi-instrumentalists who need to mix or sub-mix multiple sources.

MultiMix 8 Line features eight stereo channels with a mic/line input on channel one and stereo effects send and return. When a mono signal is present on any input or stereo send, the Left signal is automatically summed to mono for mono or stereo compatibility. Connect two MultiMix 8 Line mixers with inexpensive, common TRS cables, and they share the same mix bus for 16 stereo input channels. There is also an effects bus so you can even share the same reverb, compressor, or other effects chain between two linked mixers.

Keep an eye your mix with simple, intuitive signal clip and overload LEDs for each input and a five-stage LED level indicator at the main output.

This generously featured 1RU line mixer is at home or on stage as it is in a machine room, and it's half the price of the competition. Whether you're a professional musician, an audio contractor, or an A/V consultant, MultiMix 8 Line is the tool to get the job done at the right price.
