

iDJ

COMPACT MIXING CONSOLE FOR APPLE iPod®

BRING THE TUNES YOU LOVE FROM YOUR HEADPHONES TO THE DANCEFLOOR. The iDJ is a 2-channel mixer that enables mobile DJs and iPod enthusiasts to seamlessly integrate their portable music libraries with other music, video and sound reinforcement systems—transforming the iPod from a personal music player into a source playback device. The iDJ's compact form factor, comprehensive feature set, and onboard controls allow you to manipulate content on the iPod while never leaving the mixer control surface (3rd generation iPods and later only). Its backlit blue-on-white design blends perfectly with the iPod. The iDJ makes the music more accessible and the party better than ever.

FEATURES

- Two universal iPod docking stations will accept all model iPods with bottom connector
- Large, easy to read iPod navigation controls
- S-Video output for connecting compatible iPod video/picture content to equipped TVs
- 3-band EQ with gain control on both channels
- Dedicated microphone input with tone and level control
- Phono/line inputs for adding additional devices available on both channels
- USB connectivity (PC and Mac) enables iDJ to function as a music-loading base
- Turntable spindle receptacle enables placement of the iDJ on a turntable
- Soft touch edge bumper for extra durability
