

Surge Cymbals

GENUINE BRASS CYMBALS FOR ELECTRONIC DRUM KITS

CONVENIENT ELECTRONIC DESIGN WITH REAL CYMBAL LOOK AND FEEL.

These all-new electronic cymbals from Alesis feature real cymbals with Piezo based triggers. Surge Cymbals come in different sizes and are perfect for upgrading your electronic drum kit.

Surge Cymbals are available in a 12" Single-zone HiHat, 13" Single-zone Crash (with and without choke capability) and a 16" Dual-zone, bow/bell trigger points (with and without choke capability). Each Surge cymbal is designed to deliver crisp, accurate response with remarkable realism. They feature a custom brass-alloy with a special, clear dampening layer to merge the look and feel of real cymbals with the flexibility of electronic cymbals.

Surge cymbals can mount to standard cymbal mounts and arms for use with nearly any electronic drum kit. A special mounting design keeps the cymbal from twisting while it is being played.

Alesis drum kits are also available bundled with a complete set of Surge Cymbals:

FEATURES

- Real cymbal look and feel with the convenience of electronic percussion
- HiHat, Crash and Ride cymbals with Piezo triggers
- Choke or non-choke versions
- Easily mountable to standard cymbal stands
