

TapeLink USB

DUAL-CASSETTE TAPE DIGITAL ARCHIVER

REDISCOVER YOUR TAPES! Digitize your cassettes with TapeLink USB. This dual-cassette deck enables you to store your irreplaceable recordings on hard disk, flash, burn them to CD, or take them with you on your iPod. Rediscover your demos, jam sessions, and song ideas, and then listen to them anywhere on your iPod! Its CD-quality 16-bit, 44.1 kHz audio output accurately captures your tape recordings for secure digital archival. TapeLink USB comes with a software suite including BIAS SoundSoap professional noise-reduction software to remove hiss, room noise, rumble, electrical hum, and other background noise.

Clean up your old tape recordings of your band's rehearsals and performances and listen in your car.
